

IEMA approved Lead Environmental Auditor Course (Formerly Advanced EMS Auditor Course)

This five-day course is designed as a practical guide to leading audits and equips candidates with the skills to take on the role of a lead auditor within their own organisation or of a lead assessor (after sufficient practical experience) for third party audits.

Course objectives

By the end of the five day course delegates will:

- Receive an update on developments in environmental standards
- Understand how to audit an EMS against the requirements of ISO 14001
- Understand audit trails and audit scheduling
- Understand environmental Legislation
- Be aware of EMAS requirements and validation techniques

The Aspects International Course

As world leaders in Environmental Training, Aspects International have developed an intensive course which is highly interactive. The course uses:

- Practical experience of EMS auditing
- Clear and easy to follow course notes
- Practical group work sessions
- Detailed case studies
- Support from experienced environmental professionals who are registered auditors

Who should attend?

This course is designed for individuals who wish to lead environmental management systems audits for internal audits, second party audits or external third party assessments.

What will you learn?

By the end of the course you will be able to take on the role of a lead assessor or auditor in order to carry out third party audits. Successful completion of the course and the examination (70%) will entitle the delegate to 10 IEMA points - the equivalent to Associate environmental auditor level. NB Points are awarded by IEMA not the training provider.
